SUMMARY

IOS Developer with 4+ years of experience designing and building high-performance applications using Swift and UIKit. Proficient in the full mobile development lifecycle, from architectural design to App Store deployment. Deep expertise in performance tuning, memory management, and threading to ensure responsiveness in data-heavy applications. Passionate about solving complex engineering problems and collaborating with cross-functional teams to deliver scalable products that drive business growth.

TECHNICAL SKILLS

- **Languages**: Swift, Dart, UIKit, SwiftUI
- **Architecture & Design**: MVVM, Coordinator Pattern, Apple Human Interface Guidelines
- **Networking & Data**: RESTful APIs, JSON, Core Data, URLSession, WebSockets
- **Tools & Platforms:** Git, Xcode, App Store Connect, Google Play Console, Firebase Crashlytics

PROFESSIONAL EXPERIENCE

KriyaXLabs | *Mobile Engineer (Freelancing) | Nov 2025 - Present*

- ***On-Device AI Chatbot (Flutter):*** Developed an offline conversational chatbot using Google Gemma 3N LLM and MediaPipe, enabling on-device inference without internet connectivity or backend server dependency.
- ***IOS Feature Development:*** Owning end-to-end mobile feature development for iOS, translating business requirements into scalable SwiftUI architectures.

Codecraft Technologies Pvt Ltd | *Engineer Software Development | Apr 2023 - Oct 2025*

- Developed and delivered Flutter Web and mobile features across multiple modules, implementing Bloc/Cubit state management and Server-Sent Events (SSE) to support real-time data updates for 1k+ user sessions.
- Built reusable UI components, reducing feature development effort by approximately 20–25% through modular architecture and shared widgets.
- Participated in peer code reviews, identifying performance and logic issues early, contributing to a ~30% reduction in post-release defects.
- Collaborated with product, backend, and QA teams to ensure seamless feature integration and on-time delivery across sprint cycles.
- Worked closely with QA teams to triage and resolve high-priority defects, reducing bug turnaround time by ~40%.

Trainee Engineer, Software Development | Oct 2021 - Mar 2023

- Resolved 50+ functional and UI defects, improving release stability and user experience.
- Implemented scalable IOS features using modern Swift architecture patterns, improving maintainability and reducing rework.
- Executed end-to-end testing and defect validation, reducing production issues and improving release quality.

PROJECTS

Crampad Enterprise | Dec 2025 - Present

- Leading end-to-end iOS application development using SwiftUI, defining app architecture, implementing features, and preparing production-ready builds.

Enphase - Events Faas Portal | Jun 2025 - Oct 2025

- Developed an interactive Flutter Web Catalog UI, improving data accessibility and usability for internal users across multiple workflows.
- Implemented Server-Sent Events (SSE) to enable real-time updates, reducing manual refresh dependency and improving data freshness.
- Integrated AutoSave functionality using Hive, preventing data loss and improving form completion reliability during long user sessions.
- Applied Bloc/Cubit state management, enabling modular design and improving maintainability and scalability of the codebase.

iGoalZero | *Apr 2025 - May 2025*

- Resolved a WebView cache-related blank screen issue by implementing cache reload handling in WKWebView, ensuring stable content rendering.
- Removed deprecated Swift-based components and migrated to a WKWebView-centric implementation, simplifying the codebase and improving maintainability.
- Generated and submitted production iOS builds to the Apple App Store, supporting successful release delivery.

Covrsa Mobile | *Mar 2025 - Apr 2025*

- **I**ntegrated Flutter WebView to enable seamless in-app web content rendering, supporting multiple application workflows across mobile platforms.
- Managed environment configurations, user session handling, and secure token storage, improving authentication reliability and session stability.
- Produced and validated release builds for Google Play Store and Apple App Store, supporting cross-platform production deployments.

***Enphase Installer Toolkit* (ITK) |** *Mar 2022 - Dec 2024*

- Contributed to feature development and UI/UX enhancements across production iOS applications, improving overall usability and consistency.
- Implemented user stories and resolved application crashes using Swift, contributing to improved application stability and crash-free sessions.
- Collaborated with cross-platform teams to identify and resolve integration issues efficiently.
- Performed end-to-end commissioning and defect reporting, ensuring feature readiness prior to production deployment.
- Supported project delivery through effective teamwork, contributing to on-time releases and sprint commitments.

EDUCATION

Canara Engineering College, Mangalore

Bachelor in Engineering (BE) | Aug 2017 - Jul 2021
